CV

Marie Hildebrand Grevil

Programming | Digital Systems | Electronics Engineering

Curious and with a flair for programming. Experienced with different abstraction levels, and ready to apply existing knowledge to new areas. Observant and focused when working, building up intuition for the system at hand. Open-minded and mediating colleague, and with a strong sense of responsibility for the work that needs to be delivered.

JavaScript | Lua
VHDL | Jenkins
Visual Studio

Soft Skills

Analytical thinker
Problem solver
Persistent
Independent
Cooperative
Observant
Adaptable
Conscientious

Work Experience

2023 — **Operations Engineer**
Netcompany A/S

Application deploys, database handling, change requests, alerts, troubleshooting, automation, internal documentation.

I was part of a team exclusively focused on 3 customers, one of which had 20+ interacting applications, while another required perfect service uptime due to its critical role in Danish infrastructure.

Education

2018-2023 — **Bachelor of Engineering in Electronics**
Aalborg University

Embedded systems, desktop applications, sensors and actuators, signal processing, network, project planning, prototyping, testing, documentation.

Other Experience

2021 — **Intern**
Really A Robot APS

IR temperature sensor, testing, algorithms, porting, documentation, collaborative product planning.

2020 — **Volunteer**
De Studerendes Erhvervskontakt

Intranet, API, event planning, promotion, copywriting.

About Me

I live in the outskirts of Aalborg with my partner and our cat. I like being physically active, walking in both the city and in nature, but I also enjoy spending time indoors. My hobbies include fiber arts (cross stitch, crochet, knitting), games (MTG, WoW, D&D), as well as solving anything from jigsaw to logic puzzles. I consider myself a curious person, and I like learning about things that at first glance seem mysterious to me.
